

Dear Joost students,

our SCCA coordinators recently informed us about your visit to Ljubljana and we are very glad to welcome you on the day of our exhibition opening.

We examined your CV's and portfolios and informed the exhibiting artists about your arrival.

At the moment, we are very busy with the exhibition preparations. Our selection of artists is pretty much final now and after this decision has been made, the intense work starts- planning of the exhibition space and placement of works demands a lot of time and involvement. We need to do a lot of writing as well, since we would like to publish an accompanying exhibition catalogue.

The exhibition we are preparing will present the younger generation of artists, some of them are quite known on the slovenian alternative art scene some are still students but none has really become a part of the mainstream (yet). Therefore, we would like to show their practice and display the parallel systems which co-exist opposite to the better known artists of the same generation. Our dialog has been successful so far. Everyone seems to be quite open to different ideas which are stimulated by discussions of all participants.

On Saturday we had our first artists and curators meeting, where we introduced artists to each other and had the opportunity to talk about our planning of the exhibition space and its arrangement. We also attached a few photos of this event.

We will elaborate on our work progress in future emails. If you have any questions considering our exhibition or your stay in Ljubljana, please feel free to contact us.

Kind regards,

World of Art students
